

eFinancial solution

For financial solution organization, today's economy means rapid change. Tougher competition. Shrinking margins. New ICT technologies. All while customers are more demanding and less loyal.

Based on a flexible, scalable infrastructure, The Perceval eFinance platform set provides a robust telecommunication environment for incorporating new technologies, controlling core banking and insurance processes, and extending operations to the Internet to create a powerful, customer-focused environment.

You can focus then to the development of multichannel products and services that meet the needs of your demand-oriented market. eFinance services can help you streamline claims processing, collections and disbursements, and asset management and sustain profitable relationships with your best customers.

The Perceval eFinance Base package will provide you:

Access services

the fundamental building block in using Internet technologies to enhance your business. With the Access Services SDSL your organisation is able to integrate your systems and operations with those of your customers and financial partners, and serve customers while meeting the unique requirements of each.

Domain name service

enables the registration, operation and maintenance of the correct host name to network address mappings in the Internet Domain Name System (DNS). This will ensure the full commercial visibility.

Dedicated Hosting Services

enables exclusively your business to deploy and maintain Web sites, e-commerce portals or online data with ease and maximum reliability. With hosting services, Perceval maintains the computer that runs your hosted service. Hosting benefits your organisation by providing reliable storage and maintenance of online information. This means you can rapidly implement new finance processes and services, adapt processes to meet increasingly strict customer needs, without infrastructure investment.

VPN

provides the capability to encrypt data communications across the entire ecosystem, enabling organizations to connect securely across the Internet for the management of the specific financial processes related flows of confidential information.

In order to optimize your Business execution, Perceval proposes VoIP, Backup, AntiSpam, eMail, SLA... as additional services options.
